

Leveraged Lion Capital Monthly Report

February 2024

LLC Updates

The Leveraged Lions were extremely busy in the month of February. Portfolio Managers finalized their first-round pitches and received feedback from our directors on ways to improve. Managers then completed their first quiz, a new evaluation method used by the Executive Board to develop targeted curriculum and education plans for our members.

February was a big month for networking as recruiting moved into full swing. LLC was honored to host Goldman Sachs, UBS, Cowen, and one of LLC's Founders, Brian Callahan. Managers also completed their second round of pitches in February, showing remarkable improvement in technical and presentation skills.

The Executive Board held additional training and educational sessions to better prepare members for networking and interviewing. Our Sophomores were hard at work outside the classroom with networking, travel, and interviews. This built up to our semesterly Wall Street trip at the end of the month. Leveraged Lions had the opportunity to visit multiple Wall Street banks, and experience trading floor tours, Q&A sessions, and networking opportunities. We are incredibly grateful for our connections with these banks and have enormous gratitude for our LLC alumni and their continued commitment to our organization.

Alumni Spotlight: Sankar Ramesh '23

1. *When were you a member of Leveraged Lion Capital and what positions did you hold?*

I joined LLC in the Spring of 2020 as an Associate Analyst in the Energy sector. I spent two semesters as an associate and one semester as a lead within the sector before serving as the Director of Credit Research and finally as the President of LLC for the 2022 calendar year.

2. *What did Leveraged Lion Capital mean to you when you were on campus?*

LLC was an incredible opportunity to surround myself with talented, hard-working, and motivated people who helped me learn and improve every single day. From career advice to personal friendships, it provided a community where I was able to develop a skill set beyond what was taught in the classroom. LLC's emphasis on technical aptitude, soft skills, and time management proved to be invaluable when starting my internship and eventually full-time role. It also taught me how to learn/think quickly and ask intelligent questions under pressure, while also taking ownership of every single piece of work that I produced. Overall, I could not be prouder to have been a part of LLC and truly believe it is one of the best things a Penn State student can do to set themselves up for success.

3. *What advice do you have for members of Leveraged Lion Capital who are currently recruiting for internships?*

The biggest piece of advice I have is to take advantage of the unique career development opportunities that LLC provides. The Wall Street trip, mentorship program, bank campus visits (and more) give you a chance to get perspective on various career paths and firms from a firsthand perspective. My other piece of advice is to focus on your own path – try to avoid comparing yourself to your peers when going through recruiting. It is often an unpredictable process with twists and turns; trust your abilities/preparation and have a clear rationale of why you are pursuing the firms/roles that you have applied to. Lastly, take the time to learn from juniors and seniors at Penn State who have gone through the recruiting process before. While alumni are always a great resource, sometimes the best advice comes from those who have had these experiences most recently. This is also a great way to practice your networking skills in a more informal setting, allowing you to refine your “pitch” without much-added pressure.

Leveraged Loan & HY Bond News

In February, 36 issuers tapped the HY market, pricing a total of \$30.30 bn. Wary January CPI, \$20.60 bn of that was issued in the first half of the month. The cost of borrowing decreased for the fourth straight month with the average new-issue coupon rate at 7.60%. On the loan side, there was \$31.00 bn in issuance, excluding repricings. The leveraged loan TTM default rate rose for the fifth straight month to 3.70% and the HY TTM default rate rose to 3.04%. February saw the highest leveraged loan default volume since May of 2023.

Hot Macro Data & Yield Compression

The tone was a risk-on tone in February. HY credit outperformed IG, and CCCs outperformed the most followed by Bs and then BBs. The S&P, Dow, and Nasdaq indices all gained. Treasury yields rose in a flattening shape. Rate cut expectations shifted to May/June as payrolls, unemployment data, and CPI came in hot. Loans appear cheap relative to bonds.

Spring 2024 Organizational Overview

Leveraged Lion Capital is the nation's first student-run syndicated paper loan and high-yield bond portfolio. Founded in Spring 2017 at The Pennsylvania State University, the organization aims to educate undergraduate students about the world of fixed income through the utilization of various resources and unique relationships with financial organizations and institutions, including Bank of America, the LSTA, and S&P Global Market Intelligence. Managing an approximately \$125 million paper portfolio, students seek to learn the fundamentals of credit analysis via a hands-on approach by researching, analyzing, and pitching U.S. leveraged loans and high-yield bonds to the rest of the organization. The portfolio is divided into eight sectors that are derived from the S&P/LSTA 100 Index, consisting of Consumer & Retail, Energy, Healthcare, Industrials, Information Technology, Materials, Media & Communications, and REGAL-FIG (Real Estate, Gaming & Leisure, Financial Institutions Group).
